Focusing on the Economy

Our economic policy focuses on the future prosperity of the American people by investing in our conjoined future. Many young Americans find too late that their degree has too small of a place in our modern society. The Bochnowski/Doolan campaign pledges to incentivize majors with high and growing job demand for our incoming college students, in order to compete on a global level and kick-start the economy for the future of this count

"Focus on the Causes, not the symptoms of a Failing Economy to Enact meaningful Change"

Representative Steven Doolan

While that plan may pay great dividends in the future, for the more immediately concerned there must also be some short-term goals. Representative Doolan has made great strides in increasing trade with foreign powers, while withdrawing and shrinking our military by a moderate amount that will help the country decrease the national debt. It is also the belief of this campaign that taxes are unavoidable when living in a democratic society, and can be kept how they are to keep the government functioning. There should be renewed vigor in American's desire to create a better tomorrow, and here at the Bochnowski/Doolan campaign we are working to make that happen. Of course, there are many other plans of how to move the economy forward. We ask that the voters take time to compare the Bochnowski/Doolan strategy with our opponent, and we believe that you will see the best strategy is the one presented to you by this campaign.

Our Opponents

Rouillard and Jackson wish to cut the death tax, increase minimum wage, and increase taxes on the wealthy. According to them this will solve all of our economic problems and America will once again be in a state of fiscal safety.

It is believed by the Witter and Yang campaign that more taxes need to be enacted. Americans are already taxed enough and should not take on more burden in this already struggling economy.

According to the Thompson and Duncan campaign businesses need more tax cuts. Businesses already get away with too much, creating more loopholes will solve nothing.

Weinberg and
Nunnally's economic
policy is non-existent.
The state of the
economy must be good
enough for them.

Will any of these candidates lead this great nation into economic stability? Believe in a better tomorrow where we focus on the causes, not the symptoms.
